

**◆ Restek Catalogs:**

- Air Monitoring Products (#59977)
- Analytical Reference Materials (#59973)
- Inlet Supplies (#59979)
- Packed Column (#59985)

◆ Restek Technical Guides:

- Capillary Column Installation Guide (#59884)
- Guide to the Analysis of Petroleum Hydrocarbons in Soil and Water (#59883)
- A Guide to the Analysis of Chiral Compounds by QC (#59889)
- Guide to Direct/On-Column Flash Vaporization Injection (#59882)
- A Guide when Injecting Dirty Samples (#59881)
- A Guide to OC Set-up (#59885)
- Guide to Minimizing Septa Problems (#59886)
- Helpful Hints for Analyzing Volatile Organics (#59887)
- Operating Hints for Split/Splitless Injection (#59880)

◆ Other Restek Literature:

- Capillary Chromatography Essentials Wall Chart (#59691)
- Packed Column Brochure (#59681)
- The Restek Advantage Newsletter
- Rtx®-CLPesticides Column Flyer (#59695)
- Standards Spotlight Newsletter
- Trident HPLC Guard Column System Brochure (#59675)

◆ Application Notes/Technical Tips:

- Analysis of Cholesterol and Other Dietary Sterols (#59581)
- Analysis of Priority Pollutants (#59556)
- Analysis of Triazine Herbicides (#5955)
- Analyze Fixed Gases Using the New Rt-MSieve 13X PLOT Columns (#59566)
- Analyze Flavor Volatiles in Alcoholic Beverages (#59579)
- Analyze Sulfur Compounds at Trace Levels Using RT-Sulphur Packed Columns (#59573)
- Analyzing Essential Oils (#59554)

Application Notes/Technical Tips cont.

- Analyzing Fatty Acid Methyl Esters (FAMES) (#59584)
- Analyzing Free Fatty Acids (#59583)
- Analyzing Oxygenates in Gasoline (#59587)
- Aromatics in Reformulated Gasoline by GC/MS (#59572)
- Barbiturate Analysis (#59575)
- Detection of Synthetic & Natural Antioxidants in Food (#59582)
- Extraction of Paraquat & Diquat from Water Using Resprep C8-47
- Extraction Disks (#59563)
- Extraction of PARs Using C18-47 SPE Disks (#59565)
- Extraction of PCBs Using C18-47 SPE Disks (#59564)
- First Selective Triglyceride Analysis (#59580)
- Fire Debris Analysis (#59574)
- Florisil Cleanup for Organochlorine Pesticides & PCBs (#59562)
- Fused Silica Lined Canisters for TO-14 Ambient Air Sampling (#59561)
- Inlet Sleeve Deactivation (#59578)
- New Capillary Columns for Simulated Distillation of Petroleum Fractions (#59567)
- Opiate Analysis (#59576)
- Optimizing the Analysis of Chlorophenoxy Herbicides (#59559)
- PCB Screening in Less Than 10 Minutes (#59558)
- Pesticide Analysis (#59555)
- Purge & Trap of Volatile Organics Using Narrowbore Capillary Columns (#59560)
- Restek's Al₂O₃ PLOT Column (#59569)
- Restek's Thermal Gas Purifier vs. Conventional Traps (#59588)
- RtP-1 A New Bonded Packed Column for Simulated Distillation (#59570)
- New Rtx-I PONA Column for Analysis of Petroleum Products (#59568)
- The New Rtx-Wax Column (#59571)
- SPE Extraction for EPA Method 525.1 (#59557)
- Updates on USP-467 (#59577)
- Using Computer Modeling to Optimize FAME Analysis (#59585)

To receive free technical information, give us a call Or contact your local Restek Distributor

Good technical advice can prevent frustrating down-time and poor results. At Restek we take technical service very seriously. Our expert chemists are on hand to take your call. You won't find a more knowledgeable chromatographers group anywhere. Also for technical service call your local Restek representative

Restek publishes many technical guides to assist you in specialised applications
